

In order not to hurt yourself or damage the product it is advisable to have two persons when unpacking the FlexBase25.

Step 1. Turn the box upside-down by rolling it carefully around its long axis.

Step 2. Open the latches (totally 4 pcs) from both sides.

Step 3. Lift the box slowly and evenly from both ends at the same time.

Step 4. Move the FlexBase from its packing and proceed to connect it to your system following the reference manual (located inside the packing).
